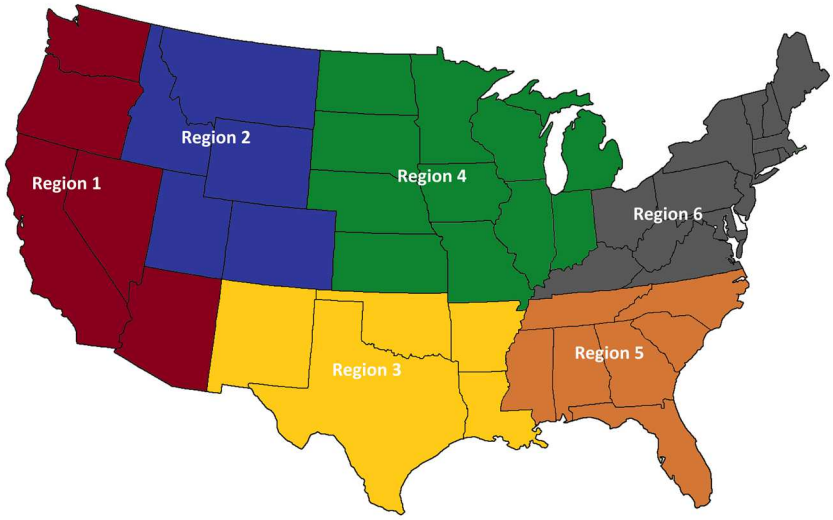
MERCK ANIMAL HEALTH EQUINE UPPER RESPIRATORY BIOSURVEILLANCE PROGRAM

Date range reported: January 26- February 9, 2018

Data provided by Merck Animal Health represents cases submitted from a sample of equine veterinary practices and confirmed at UC Davis PCR Laboratory. This data is provided for informational purposes only and does not necessarily represent the frequency of disease in the Unite States. The data is intended to be used to assist veterinarians and horse owners in determining best practices for biosecurity at home and when travelling with their horses. Additional information on the Equine Herpesviruses (EHV-1 and EHV-4), Equine Influenza Virus (EIV,) and *Streptococcus equi* (S. equi) can be found on the EDCC website.



Date range reported: January 26- February 9, 2018

Number of Cases Confirmed:

	Region 1	Region 2	Region 3	Region 4	Region 5	Region 6
EHV-1						
EHV-4	3		2		4	2
EIV	2	1	1			
S. equi	2	2	2		1	3

Remain aware of disease activity confirmed in your region with biweekly surveillance reports
